

Balemaster® Balers

we offer the industry's largest selection of quality balers

Large Recycler Model - 25 tons per hour

Corrugated / Folding Carton Plant Baler - 1500 lb. bales

Large Printer Model - 15 tons per hour

Distribution Center Model

Manufacturing / Assembly Plant Model

A Baler to Meet Your Exact Needs

Industry's Broadest Line of Balers - 100+ Models

Whether your requirements call for a single 1000 lb. bale/day or 20 bales/hour we have the baler to meet your exact needs.

Balers for a Wide Variety of Applications

Our Baler Models incorporate an ideal combination of Accessories to meet your requirements. Recommended models vary depending upon feed method.

The Industry's Most Efficient and Reliable Auto-Tier

Unique design requires the fewest number of component parts. The Auto-Tier is easy to maintain and service. Reliability is achieved through simplicity.

Energy Savings and Efficiencies

Our hydraulics provide maximum efficiencies, using regenerative circuits and dual power packs to minimize horsepower usage and save energy.

What Makes Our Balers the Best

Balemaster distinguishes itself as a leading innovator of baling technology having designed and installed balers for a wide range of applications worldwide. Our product line addresses the requirements of our customers, offering superior design, feature-rich touch screen diagnostics and controls, industry leading energy efficiencies, easy maintenance, increased reliability and longer service life...and backed up by flexible service programs. Simply put, our balers are built to be the best.

baler applications include:

Paper • Corrugated • Folding Carton • Chipboard • Newsprint • Wax or Poly Coated Stock • Non-Wovens • Pulp • Aluminum and Steel Cans • P.E.T. and H.D.P.E. Bottles • Foils • Textiles

Balemaster® Shredders & Hoggers

dependable performance in the most demanding of applications

1400 Series "Quiet" Shredder - 25 to 40 HP
63, 76, 90, 103 and 117" Feed Widths

The 1400 Series Low RPM
Quiet Shredder *an industry favorite*

Our quiet shredder offers high capacity - up to 10,000 lbs. per hour of corrugated / folding carton sheet waste and cores. Solid steel shafts and blades lessen maintenance costs and downtime. Low RPM arbor rotation makes less noise during operation and provides a low dust working environment.

1200 Series Hogger - 50 to 100 HP
62, 77, 92 and 107" Feed Widths

1000 PT Series "Piggy-Back" Shredder
36 and 42" Widths, 30 to 100 HP

High Volume - Heavy Duty Shredder, Mounted on Baler
48 x 70" Feed Opening, 100 to 300 HP

1500 Series Floor Sweep Shredder
38 and 54" Widths, up to 30 HP

Built to Uncompromising Standards

Heavy-Duty Construction Built for Dependability

Every part of our shredders are expertly designed and constructed for heavy-duty operations and offer the longest service life in the industry.

Advanced Blade and Arbor Design

Our advanced blade and arbor design can be matched to your requirements, achieving the best shredded piece size for maximum capacity and bale density.

Easily Integrated into Your System

Designed for easy servicing and integration into a fully automatic waste handling system. Custom configurations are available to satisfy space constraints.

Low Noise Models

We've perfected noise control with a host of engineered noise suppression techniques, featured in some of our models, including the 1400 Series.

Meeting your High Performance Needs

Balemaster Shredders are the preferred high performance choice for a variety of wastes, including; corrugated, folding carton, paper, magazine, book, slabs, butt rolls and cores, etc. Models are engineered for heavy duty service with quality welded steel construction. Many advanced features are provided to maximize throughput capacity. User friendly Touch-Screen controls are included with most models.

Engineering Vision is the primary ingredient of every **Balemaster** product
